Global Soft Solutions Selects AptSoft's CEP technology

Partnership helps companies implement Complex Event Processing - a new class of event-driven applications that enable the real-time enterprise

BOSTON, MA and SUNNYVALE, CA – July 16, 2007 – AptSoft Corporation and Global Soft Solutions today announced a strategic partnership to provide companies with proven expertise in the strategy, development and deployment of complex event processing (CEP) applications. CEP applications provide an organization with the capability to detect, correlate and intelligently respond to defined patterns of events as they occur across the extended electronic enterprise.

Global Soft Solutions will utilize the award winning AptSoft Director™ for CEP platform to implement real-time event-driven solutions for clients that require:

- the ability to detect and understand the business relevance of patterns of events (activity) as they occur;
- the orchestration of the extended infrastructure in the right response at exactly the right time.

“Solving event-driven problems requires not only the right skill set and architecture, but a comprehensive development and execution technology platform that helps companies easily, rapidly and flexibly organize and implement their system requirements. Past attempts to build these intelligent sense-and-respond applications using custom code and other event-oriented technologies proved costly, rigid and ineffective,” said Raj Lohia, CEO of Global Soft Solutions. “AptSoft’s CEP platform provides the functional scope, ease of use and scalability to meet the most demanding of event-driven application requirements in the real-time enterprise.”

Global Soft Solutions selected AptSoft Director™ for CEP as the technology platform upon which it will build its event-driven architecture (EDA) practice. “The combination of Global Soft’s record of delivering tangible benefits and measurable results along with AptSoft’s award winning technology will ensure the successful deployment of critical application solutions,” stated Frank Chisholm, CEO of AptSoft. “Global Soft’s in-depth knowledge, skill set and creativity will make a significant impact on the adoption of EDA and CEP in companies around the globe.”

About Global Soft Solutions

Global Soft Solutions, based in Sunnyvale California, has its roots in Application Integration. Committed to very high customer satisfaction from the company’s inception, its Executives and Senior Practice Partners, have experience in taking hundreds of companies into production. Global Soft Solutions has forged key technology and business partnerships with several key ISV technology leaders. These alliances have enabled Global Soft Solutions’ team of committed professionals, to build world-class, award winning solutions. Its staff has wide-ranging experience in various aspects of the enterprise applications domain, delivering services in North America, Europe, and Asia. Global Soft Solutions primarily offers its services to the companies in the manufacturing, financial, logistics, healthcare, telecommunications, and information services industries.

About AptSoft Corporation

AptSoft Corporation, based in Burlington, Mass, provides a Complex Event Processing design and execution platform to help companies implement a new class of event-driven applications as part of a service oriented architecture. These applications involve processing logic that is unpredictably non-linear, dynamic, and continuously influenced by outside activity, often found in the areas of Fraud Prevention, Risk Management, Compliance Verification, Customer Service, Customer Acquisition, Cross-sell and more. Compared to today’s workflow, rules-engine and monitoring technologies, AptSoft’s platform is an order of magnitude more powerful.
